

## HISTORIC LOG BOOK INTERIM APPROVAL APPLICATION

Please allow up to 3 weeks for this application to be approved and processed. Incomplete applications will be rejected.

This application assists in the issuing of a logbook upon completion of a machine. Prior to building a machine that consists primarily of replicated parts, plans and specifications must be submitted to MA for interim approval.

It is important that all relevant information is supplied with this application. This may include photos, articles, photocopies, plans, technical drawings/sketches etc.

**The approval of this application does not automatically mean that a logbook will be issued to the completed machine, but will assist the Eligibility Inspectors in a final decision. It will also assist the applicant/builder in the correct completion of the machine.**

Preferably, please email this complete form to [rules@ma.org.au](mailto:rules@ma.org.au) with any digital photos (electronic files) attached in your email. Mailing a completed hard copy of this form to Motorcycling Australia will delay the process.
